

Kingsley Udeh

Software / Full Stack Developer

Lagos, Nigeria | keengsleyudeh@gmail.com | +234 916 873 0140 | Portfolio: <https://bit.ly/4vL4jlR>

PROFESSIONAL SUMMARY

Full Stack Software Developer with a strong Mechatronics Engineering background and hands-on experience building responsive websites, web applications, progressive web apps, and IoT-integrated solutions. Skilled at translating Figma designs into pixel-perfect interfaces, connecting real-time data to clean user experiences, and optimizing applications for performance, usability, and scalability. Brings a practical blend of frontend engineering, embedded systems awareness, and disciplined teamwork across startup and research environments.

TECHNICAL SKILLS

Frontend	React.js, Next.js, HTML5, CSS3, SCSS, Tailwind CSS, Gsap, Framer Motion, Postman
Languages	JavaScript, TypeScript, Python, C, C++, Java, Assembly Language
Backend & Data	Firebase, NodeJs, Express, REST API integration, Postgres, CI/CD, real-time database workflows
Tools	Git, GitHub, Figma, Miro, Google Workspace, Jira, Asana
Specialties	Responsive design, PWAs, IoT dashboards, microcontroller logic, performance optimization

PROFESSIONAL EXPERIENCE

Ceed Venture Studio

Software Engineer

Remote

September 2024 – February 2026

- Built and maintained responsive websites and web applications for startup products, translating business needs into clean, usable interfaces.
- Contributed to code reviews to improve quality, maintainability, consistency, and knowledge sharing across the development team.
- Used Git and GitHub for version control, branch management, collaboration, and efficient code delivery.
- Developed reusable frontend components to improve interface consistency and speed up implementation across projects.

Smart World Research Hub

Full-Stack Engineer

Owerri

May 2024 – December 2024

- Built web applications for IoT-related systems, connecting software interfaces with hardware-driven workflows.
- Wrote application logic and microcontroller code to support device communication, automation, and data handling.
- Optimized websites for speed, responsiveness, and smoother user experience across devices.
- Supported implementation across frontend, backend, and embedded-system layers for research-focused solutions.

Cardioll

Frontend Engineer

Owerri

June 2024 – July 2024

- Developed frontend interfaces for IoT-enabled monitoring and real-time data presentation.
- Retrieved and displayed live database records to support timely user visibility into system activity.
- Implemented chart-based dashboards for visualizing sensor readings and system status.
- Applied frontend and IoT knowledge to support data-driven product features.

Motenrise

Frontend Developer

Lagos

2023

- Converted design mockups into responsive, pixel-perfect web pages using modern frontend practices.
- Developed user-friendly website interfaces with HTML, CSS, and JavaScript.
- Implemented responsive layouts for strong viewing experiences across desktop, tablet, and mobile devices.
- Used Git for organized teamwork, code management, and smoother project delivery.

SELECTED PROJECTS

- **Portfolio:** Disclosable projects are available at <https://bit.ly/4vL4jlR>
- **Web & Startup Products:** Responsive business websites, web applications, and progressive web app interfaces for startup environments.
- **IoT Data Interfaces:** Real-time data dashboards and chart-based interfaces for sensor readings and monitoring workflows.
- **Hardware-Software Integration:** Microcontroller logic and software support for IoT-related systems.

EDUCATION & TRAINING

Federal University of Technology, Owerri	November 2018 – May 2024
<i>B.Eng. Mechatronics Engineering (Software Focus)</i>	
CGPA: 4.7/5.0. Relevant coursework includes Computer Science, Programming, C++, C, Assembly Language, JavaScript, Java, and Python.	
MDEEG Academy	2024
<i>Frontend Development</i>	
ALX	2024
<i>Professional Foundations and Pro Software Development</i>
